Director

State of California—Health and Human Services Agency
California Department of Public Health

ARNOLD SCHWARZENEGGER
Governor

March 23, 2009

Dear Family Planning, Access, Care, and Treatment (Family PACT) Provider:

The California Department of Public Health, Office of Family Planning (OFP) presents the next release of the Family PACT Program *Provider Profiles*. The enclosed packet of *Provider Profiles* materials has been developed for the physician owner/medical director associated with the National Provider Identifier (NPI) shown in these documents and reflects only the activity of the provider(s) and the site(s) reimbursed under this number.

This represents the eighth semi-annual release of the profiles in hard-copy. In an effort to be proactive in this time of budgetary constraints, we would like to encourage you to go “paperless” by accessing and downloading future profiles from the Family PACT Web site at www.familypact.org and opting out of receiving these printed documents by mail. When you elect to do so, OFP will send an e-mail to alert you when the next release of the profiles is available. To help OFP contain costs for printing and mailing, please use the enclosed Provider Response Form to complete your request to go “paperless.”

The profile presents snapshots of your practice patterns *in relation to your peers* who participate in the Family PACT Program: public sector (governmental, non-profit, and community clinics) and private sector providers. Detailed interpretation of the indicators is enclosed to assist you in understanding your profile. The current profile reflects activity from July 1, 2006 through June 30, 2008. Where your data are insufficient for any given indicator, you will see “NA” (not available) meaning that the data for the measure are not statistically reliable for the time period.

Program data are monitored by OFP through contracts with the University of California, San Francisco, Bixby Center for Global Reproductive Health, and with Electronic Data Systems. Data sources include provider enrollment, client enrollment, and claims. These data are presented to Family PACT providers in the form of practice profiles for informational purposes with the expectation that feedback will be useful in clinical quality improvement (QI) and utilization management (UM).

If you elected to make changes in your practice as a result of Family PACT profiles you received between September 2005 and July 2007, the effect of those changes now may be apparent in your profiles.

OFP uses the profiles to develop QI-focused technical assistance and provider-specific QI/UM action plans. When practice patterns reflect consistently significant outliers in relation to peer groups, referrals for additional review may be made to the California Department of Health Care Services, Audits and Investigations.

As noted earlier, using the NPI associated with your practice, you may access your profiles online at the Family PACT Web site www.familypact.org on the *Provider Profiles* subpage. The interpretations document, methodologies for each indicator, the statewide profile of public and private providers, Frequently Asked Questions (FAQs), as well as an additional indicator “Pregnancy Tests per 100 Family Planning Encounters” are all posted on the Web site.

Please complete the enclosed Provider Response Form to indicate your preference for “paperless” profiles, to update contact information including your e-mail address, and to indicate if you wish to have one-to-one contact with OFP.

If there are other questions or comments not addressed in the response form or on the Web site, you may contact OFP by calling (916) 650-0414 or by e-mail to fampact@cdph.ca.gov.

Sincerely,

ORIGINAL SIGNED BY

Laurie Weaver, Chief
Office of Family Planning
